

January 9th, 2023

Dear Customers and Partners,

We are excited to announce that on January 1st 2023, Turner Engine Control Solutions GmbH acquired the governor department of MWB Power GmbH. The trading name for our newly enlarged organization is Turner MWB, whilst the legal name will remain Turner Engine Control Solutions GmbH.

Turner MWB will operate from two locations, Langen/Hessen and Bremerhaven. With two locations in Germany, Turner MWB will provide a complete range of services for controls and safety solutions on turbines, engines and power management applications.

This step will help us to operate more efficiently, improving the overall quality of our services, while increasing focus on local market needs. Turner MWB will specifically support and distribute products from Woodward and SEG but also on a wide range of other controls and safety products.

What does this mean for you?

On a day-to-day basis it's business as usual, with Turner and MWB resources joining forces to provide a full range of governor and control related services in Germany from both Langen/Hessen and Bremerhaven.

- A central contact point for distribution, repair, overhaul, engineering and servicing related to controls and safety solutions on turbines, engines and power management applications.
- You will continue to receive full support from your usual contact person.
- Telephone numbers and email address in Bremerhaven will be integrated into the Turner systems. You can reach us using the below contact details:
 - +49 (0)6103 / 73299-0
 - info.de@turner-ecs.com

Our story continues...

We started as a certified Woodward independent repair facility in the early nineties. Over the years we have expanded our services. We still offer mechanical governor/actuator repair and distribution but, can also deliver complex projects to upgrade complete mechanical and electrical control systems of reciprocating engines and turbines driving generators, pumps or compressors.

We have a strong belief in the value of local presence in order to make sure we meet every local market need.

We combine this commitment with the ability to provide in house specialist engineering expertise from any of our locations when required. We are located in Germany, Italy, UK, KSA, Netherlands, Qatar and UAE.
